

<b>S2. Round 2 scores for outcomes that met inclusion criteria in the Delphi survey in descending order</b>	
<b>Outcome</b>	<b>Percent of all participants rating outcome 7-9</b>
Gestational diabetes mellitus recurrence	98.3
Diagnosis of type 2 diabetes	96.8
Attending postpartum diabetes screening test	95.2
Weight	94
Total energy intake	93.1
Healthy lifestyle behaviours	92.9
Completion of OGTT/blood glucose/HbA1c post partum	92.1
Diabetes knowledge	89.5
Diabetes prevention behaviour knowledge	89.5
Motivation to change	89.5
Oral glucose tolerance test (OGTT)	89.3
Fasting blood glucose	89.2
Body mass index	88
Diet quality	87.9
Completion of targets/activities	87.5
Perceived diabetes risk	86
Glycated hemoglobin test	84.5
Carbohydrate intake	84.5
Sedentary time	84.5
Cardiovascular disease	82.5
Health service utilisation and cost	82.2
Moderate to vigorous activity	81.1
Fat intake	79.3
Post-partum weight retention	79.1
Social support	79
Diagnosis of type 1 diabetes	77.8
Saturated fat intake	77.7
Intervention components engaged with	76.7
Quality of Life	76.2
Fibre intake	75.9
Diet self-efficacy	75.4
Neonatal mortality/stillbirth	75.1
Diastolic blood pressure	74.6
LDL cholesterol	74.6
Perceived barriers	73.7
Whether goals were set for the woman and achieved	73.1

Food group servings	72.4
Glycaemic load	72.4
Health literacy	72
Weight self-efficacy	72
Waist circumference	71.7
Hypertension	71.4
Systolic blood pressure	71.4
Intensity of exercise	70.6
Sleep quality	70.6
HDL cholesterol	69.9
