

**Supplemental Table: Coefficients from Multivariate Models of the Mean HbA1c, LDL-C, and SBP Levels in 2011**

	A1c <sup>1,2,3</sup>	LDL level <sup>1</sup>	SBP $\geq$ 130 <sup>1</sup>
American Indian/ Alaska Native (ref: Non-Hispanic White)	0.23***	0.73	0.29

\*\*\*Statistically significant at  $p < 0.001$

<sup>1</sup>Restricted to patients with a measurement in year 2011

<sup>2</sup>Model controls for whether patient had a dispensing of insulin in year 2011

<sup>3</sup>Model controls for whether patient had a dispensing of an oral diabetes medication in year 2011

Note: All models control for patient age and gender, geocoded Census block group-level education and income, HMO site, duration of diabetes, and comorbidities using the Quan Modified Elixhauser Comorbidity Scale
