

Supplementary Figures

Supplementary Figure S1

Cumulative event rates for cardiovascular events according to the statin category in patients with type 2 diabetes and with prevalent coronary artery diseases (CAD). Blue line, moderate-intensity statin group; Green line, low-intensity statin group; Red line, no statin group. There was no significant difference in the statin category (log-rank P = 0.73).

Supplementary Figure S1

Supplementary Figure S2

Cumulative event rates for acute coronary syndrome events according to the statin category in patients with type 2 diabetes and with prevalent coronary artery diseases (CAD). Blue line, moderate-intensity statin group; Green line, low-intensity statin group; Red line, no statin group. There was no significant difference in the statin category (log-rank P = 0.37).

Supplementary Figure S2
